As Singapore apparently is aspiring to

follow Hongkong in regard to the classification of her legal practitioners, so is she discovering from the experience of this t olony how foolish it is to neglect the practical machinery of the higher Courts. It is not to be supposed that the good people of the Straits have not down ashort distance outside the harbour. discovered by painful experience that a Court with an inefficient, inadequate, or Jowana to the indisposition of Mr Tonnochy, under-puid staff is upt to be a source of annoyance and injustice; but the Siga- all police cases which have been remanded glance at the history of the Superior Friday, the 27th inst. Courts here in Hongkong to find a corroboration of the principle which their Judges have recently laid down with so much force and clearness. We are not aware whether the experience in the Straits has extended so far as that in stranding of the S. S. Hailoong. . Hongkong in the matters of figuluent the Judges is to be taken as any in-Settlements have caused no small continues his journeyings by way of the amount of inconvenience to suitors. Straits, Hongkong and Japan. In this connection, it may be said that this Colony has suffered more from a Wilson's Circus has left Point de Galle n zation in the vayious subordinate debusiness of another leading official; prosperous season here. and the Court was left very much to itself. The learned Chief Justice, WE are informed by the Superintendent for instance, instead of seeing that the of the P. and O. Steam Navigation Com. officers performed their duties, or that pany that the Company's steamer Recense, the Official Administrator and Assignee with the next outward English mail, left had done his part honestly and fairly with regard to moneys outrusted to him. fell to heaping obloquy upon the heads morning (21st). Si of the unfortunate creditors who had to the 22nd April.

is probably now being considered in Downing Street, if it has not already been disposed of. And what is the result, so far, to the unpaid creditors of the historical bankruptcies? Those whose names had to appear on the schedules of the bankrupts of long bygone days are still longing and waiting; and there is apparently as much chance now of their obtaining the small percentage of their own as there was, say a duzen years ago. All this, however, by the way. If the arrears of the "muddle" were but cleared off, there is a possibility that things may go more smoothly and more reputably in the future. But to return to Singapore. As we have said, the frequent changes as the result of the inudequate salaries of the Registrar's staff in Singapere appear to be the greatest defect in the

system pursued there. The remarks of

so sensibly suggestive that we reproduce

the Straits Judges are so apposite and

them. The report states :--That the Registrars of the Court should be officers of some legal knowledge and oxperience, of sufficient age and acquaintance with men and things to enable them to deal other matters brought before them with temper, discretion, and business ability, and that they should, as depositaries of much o the practice of the Courts and details of their procedure, look in the public interests to their offices as those of a permanent character, are propositions too obviously true to need exposition. In these Settlements, in the absence of Judges, either on duty or on leave, the Registrars also exercise very large judicial functions, and in Penang, until recent changes, have acted with great advantage as administrators, guardians, and trustees, solely or jointly with others, whenfrom the nature of the case, the rights and 8 A.M. Mass and Sermon. 6 P.M. Evening property of suitors would otherwise have certainly been the subject of fraud and

It seems to us of the highest importance that such officers, and their immediate subordinates, should be paid with more relation to their general position and the character of the duties they discharge, and should not be pecuniarily so placed that the fairest and most common prudential considerations must induce them to look to the earliest opportunity for a change—an opportunity which may be said to be coterminous with the acquisition of that knowledge of the native languages and obsracter which is so valuable an introduction to successful practice at the bar. That officers should have to accept, and the Government have to appoint to, such offices, on such an understanding, seems an anomaly so fatal to the satisfactory working of the Courts, that we are compelled to go beyond the individual representations which from time to time have been made, collectively calling attention to the subject. Such reductions as have been made, amounting, in the case of the Registrars, to from 30 to 40 per cent., and made during a period in which the cost of living has risen in a nearly proportionate ratio, seem to exclude the hope that qualified men can be procured to retain these offices, even if, by exceptional good fortune, or in ignorance of the conditions of life in the East, they may be found to take them. In the meantime, however, the position of suitors, in all matters which require the aid of the Registrar's department is one painfully and unjustly affected by the delays, inexperience, and inefficiency which these changes involve, and the character of the Courts is lowered generally. The matter seems the more to be regretted, as the general public have never shewn any disposition to stint in the arrang necessary for the due administration of justice; the revenues of the Colony are, other persons who may desire to con- and have been, ample to meet its requiresult the files of local, China, Japan, ments; and the sums received from the American, English, Indian or Austra- civil suiters in the various Courts defray an lian newspapers, are invited to call at exceptionally large proportion of the cost the "CHINA MAIL" Office, where over of the whole administration of justice, both

THE Institution of the Telephone Exchange. concerning which we have had frequent paragraphs in these columns, promises soon to become an accomplished fact in Hongkong. The requisite machinery and instruments are here; the agents and assistants of the Oriental Telephone Company are on the ground; local agents are appointed in the person of Mesars Gibb Livingston & Co.; the commercial public have taken very kindly to the scheme. although it has necessarily been laid before them in the most rudimentary form, and there seems to be every reason to believe that when it comes to be fairly launched it will be taken up with an avidity and earnestness which cannot but ensure success for it. Application has been warded to the Government for leave to take the necessary steps,—by the introduclature, or by whatever other means the promoters may be legally or by the Government advised that their objects can be best secured, to place the promoters to be hoped that no unnecessary obstacle will be thrown in the way of those who or body of persons in the Colony. An official despatch from General Scobeleff to the Grand Duke Michael states that Sirdar Obas Murad Tikma, the principal leader of the Tekke Turcomans, arrived at Askabad on the 9th inst. with a number of followers, including several influential Sirdars, in order to declare his submission to the Russian authorities. The chief delivered up his sword to General Scobsleff, who returned it to him in the name of the General Duke, assuring him at the same time of the Imperial pardon: Sirdar Tikma then awore allegiance to the Emperor. General Scobeleff concludes by declaring that with submission of Sirdar Tikma, the expedition against the Tekkes is brought to a close. Tushkent advices report the serious illness of General Kaufmann, Governor Ceneral of the Turkestaan region. It is stated that he has had a peralytic or apoplectic stroke, and General Kolpakowsky. the Deputy-Governor, has been summoned from Vernoe to take charge. General Scobeleff will probably be nominated to the important post so long held by General Kaufmann. - L. and C. Express.

THE latest addition to the British Empire -The Portuguese Government has signed the Treaty ceding the district of Lorenzo Marques to Great Britain, in consideration of certain advantages to Goa; and though the ratification of the Portuguese Parliament is not complete, the Lower House has accepted the Treaty. Lorenzo Marques. which the English will probably call the Colony of Delagoa, is a province of 18,000 square miles, with a coast-line of 140 miles, stretching from Zululand all along the northern half of the Transvaal. It is the Transvaal, in fact, what Dalmatia is to Bosnia. It contains the magnificent harbour of Delagon Bay, and not only given us a separate entrance into the Transvaal, but renders insurrection in Zululand exceedingly difficult. Any one who glances at the map will see that with a short railway from the Bay to the Transvaal plateau, North Transvaal and Delagos together would form a splendid sub-tropical colony, with many climates and many cultivations. There are no inhabitants in the new province, and it is asserted that the tsetse-fly prevents the. Among the small group of foreigners who in China have shewn commendable zeal-in geographical research the past ten years. General Mesny is not the least persevering, although as yet he has not published a consecutive narrative of his journeys or of his sojournings in the interior. That his experiences of the past two years have been as diversified as the scenery through which his journey hence toward the wide North-West has conducted him, the glimpses of them afforded by his occasional letters to local acquaintances have served to apprise us, whilst vividly illustrating the conditions of life among peoples of different races well calculated to excite an interest compensative to the foreign traveller for the personal hazard incurred; albeit that is not a little, as his former reports have shewn.

In view of it and of his cherished purpose, it is gratifying to read in his letter to a Missionary friend of his, dated "Lan Chau Fu, 19th February 1881," the capital of Kan-Suh province, that he expected to start two days after for Hami, en route to Hi (Kuldsha); "whence," as he says, "it may be difficult to correspond with friends." He adds that there was much talk of war with Russia and an appearance of eagerness for it; but that he inculcates " Peace with Honour." You will observe that Lan Chau is seated on the south bank of the Hwang. ho (Yellow-river) just at the remarkable bend or sweep in its course near the western extremity of the Great Wall, in which an almost corresponding bend has been constructed; that his most direct route to (though of this he says nothing) about due West, and thence onward, apparently, West by North to the border of Kuldsha. This sketch of his journey carries my thoughts back to the period of Lord Napier's coming to Canton, and the consequences to the Hong Merchant and others banished to Ili ("the cold Country") for life; who after leaving Lan Chau, as General Mesny was about doing, must have felt that he was being " cast into outer derkness," for looking at the map one sees the contrast between a thickly-peopled country and a desolate region with few cities or towns, and in the distance extensive deserts and long mountain

NOTES FROM SZE-CHUAN.

Lan-chow, Saturday, Feb. 12. This day I paid my third visit of Inspection to the Cloth Factory, and I regret to say that it was not at all satisfactory. I was especially invited to go by the Joint Superintendents, Yang Ming-K'yin, a Tao-tai of the Hoe-pu, and Lai-chang, General and Superintendent of the Lan-chou Arsenal I was invited for noon, but on my arrival neither of the Chiefs were there to receive me, and when they arrived they had so much other business to do, that I could not get to speak to them, so two small Weiyüans, of the 9th class, were sent to show me around, but the time allowed us was too short to examine things properly. I however, ascertained that the coarse wool, though already too coarse to do anything, is piled on the ground-floor to rot, that only 20 per cent of it is fit to make coarse flannel, 30 per cent railway rugs, and 50 per cent waste being coarse and full of straws. Impossible to make good yarn from it, and when the yarn is not good, nothing can be produced worth the name of flannel or cloth. Even for blankets the material is coarse. I found the honest and intelligent Foreign director at work: frilling Cloth, the dirtiest operation in the Factory, which ought to be managed by a separate instructor, is thus left to the Chief. The apprentices, though willing and obedient, are very stupid, but it is expected they will learn in a few months, what it takes years to learn by intelligent Foreigners, H. E. Taoh Tsung-tang, with the best intentions for the welfare of these North-west Provinces, has spared neither money nor pains, to import excellent plant and machinery, and the several foreign directors or instructors necessary to teach the natives the manufacture of cloth on foreign principles, but his efforts are ill paid, owing to the want of proper management.

If any visitor to Ningpo should miss the old rusty English cannon and other guns which have been lying on the City walls and in our streets for so many years, it will be satisfactory to know that at last they are of some use, in making shell, &c. Much more is such an event important and interesting at this Sauen, Miss E., 215, Betts Street Cinmost exceptional season. We have already expressed our opinion that it would have been better for South Africa and more conducive to the peace of mind of her Majesty's Sovernment if the Liberal Ministry had been more decisive in their recognition of the acute character of the crisis in which the Conservative Government left country. Doubtless every effort was made by interested persons to conceal from eyes symptoms which would have imperatively commanded rapid and definite action ; Wood. A. G.; P. O. Box, 1,607 San but it is a pity that they did not exhibit more independent reliance upon their own judgment and their own strongly expressed convictions. We think it hardly imaginative to suppose that, had the new Ministry been quick to act upon their conviction that a momentous crisis had been reached in South Africa, and promptly substituted Sir Hongkong, 20th May, 1881. Hercules Robinson for Sir Bartle Frere, peace would now prevail in Basutoland Pondoland, and the Transkei, and the strain in the Transyaal would never have reached the horrible point of revolt, murder, and civil war. If such prompt exchange had cost Sir Hercules heavy self-sacrifice, we are very sure that his devotion to the Empire and to public duty would have carried him through with it. THE INFLUX OF CHINESE TO

colony have elicited information of a not yery encouraging nature. We suggested ast week that if the visitation was to be regarded as an exceptional thing, which would soon cease, there might not be much to complain about, but that if it were the first ripple of a steady flowing tide, the question would have a more serious aspect. Within about a fortnight upwards of 2000 Chinese have arrived, and we understand that there is now a very large number affoat en route from Hongkong to this colony The question that is prompted by this migration is, what has caused it? and it is a question not very easy to answer. So far as this colony is concerned, there has been no special cause for it, further than the general prosperity of the community, which however, is scarcely sufficient to account for the migration of such numbers of an alien race hitherward. The Chinese who are here appear as greatly exercised in mind as the Europeans at the sudden arrival of so many of their countrymen. They deny that the new comers are under engagement to persons either here or in China and explain that the exodus from the home country is occasioned by the great depression which exists there. The poorer classes. from whom the emigrants are drafted, have to face the prospects of starvation in their own country, or seek the wherewithal to keep body and soul together in some country where their energies would have freer and more profitable scope. The new comers are described by some of their countrymen. who have already made homes for themselves in this city, as ignorant people, who are unable to either read or write. It is only by great selfdenial that they are able to scrape together sufficient money (about £8, we believe) to pay for their passage to Australia; and the great part of them are almost penniless when they land here. Some of the Chinese merchants in Sydney expressed to our reporter their belief that now the tide of Chinese immigration to these shores has commenced, we shall have a steady influx, and that before the year is out 20,000 Chinese will land at this port, unless some check can be put upon the inflow. Instead of being, as many people think, a source of profit to the Chinese employers of labour here, the immigrants prove a serious burden, for they have to be housed and fed until they can be sent, or forced to go, into the country. In reply to a question as to why they admitted the strangers into their houses, the answer was What can we do! They are our country men, and if we did not admit them then will fall into the hands of the police. document has been placed in our hands signed by a respectable Chinese resident which states that the majority of Chinese merchants and residents in Sydney are averse to the wholesale importation of Chinese to this colony such as is now taking Dead Letters.

CRUISE OF THE " ANNIE."

The following is Captain Frier's narrative of his late eventful cruise :--

-Athenceum.

I reached Testo Island on the 17th January, and found there H. M. S. Emerald. She sailed on the 18th for Brocker Island, and I afterwards learned that she opened fire with shell and killed two natives, carrving away another, who was given up as a murderer of the teachers. While I was lying becalmed of Teste Island 20 Brooker Islanders arrived, whom I recognised as part of the murderous band who have been committing many atrocities, and learned from friendly natives that their intention was to secure the assistance of the Teste Islanders in endeavouring to capture my vessel. I, however, kept a good watch and | sel. The ship put into the port of Yokonever gave them a chance of taking me by hama, Japan, where Ross was turned over to surprise, and they knew pretty well that | Van Buren, the American Consul, for trial, my crew were well armed and would stand by me in case of an open attack. TRADE MARK .- Sanctioned by H. M's. Government.

HEALTH, STRENGTH, & ENERGY.

Trade Mark-PHOSPHODYNE. DISCOVERED AND SO NAMED, A.D. 1862,

BY R. D. LALOR, M. D. DR. LALOR'S PHOSPHODYNE is a Pure Solution of PHOSPHOROUS in combination with the Vegetable Alkaloids Quinin, Cypripedin. Xanthoxylin, &c., prepared by a Chemical process known only to DR. LALOR, producing a remarkably Elegant and Pleasant Tasted Preparation, equal to the best Wines, Prefectly free from Strychnia and all other Dangerously Active Drugs; superseding the numerous objectionable forms of Phosphorous Pills, Pilules, Oils, and other Nauscons Mixtures with which the Market has been flooded since the Phosphoric Treatment of Disease was first made Public by DR. R D. LALOR, in 1862.

To Residents in India, China, and the Cologies, it will prove invaluable as a RELIABLE Liver Tonic and

a Vitalizing Restorative. This Phosphatic combination, the Wonder of Modern Chemistry, is pronounced by the most eminont members of the Medical profession to be unequalled for its power in replenishing and claborating the Vitality of the Body; by its sapplying all the essential constituents of the BLOOD, BRAIN, and NERVE SUBSTANCE; M STS. and for developing all the Powers and Functions of the system to the highest-degree; by its being agreeable to the palate, and innocent in its action. While retaining its wonderful properties, it acts as a Specific, surpassing all the known THERAPEUTIC AGENTS of the PRESENT AGE, for the SPEEDY and PERMANENT CURE of all derangements of the Nervous and Blood Systems. Nervous Prostration, General Debility, Mental and Physical Depression, Incapacity for Study or Business, Noises in the Head and Ears, Less of Energy and Appetite, Indigestion and Liver Complaints, Flatulence, Nervous Fancies, Hypochondria, Nervous Debility in all its Stages, Loss of Memory, Softening of the Brain, Paralysis, Affections of the Spinal Column, Lumbago, Sciation, Affectious of the Kidneys, Bladder, Urinary Deposits, &c., Ague, Spasme, Asthma, Consumption, Chronic Bronchitis, Scrofula and Skin Diseases, Rickets (in children), Wastlug or Withering of the Muscles, Impaired Nutrition, Impoverished Blood, Premature Decline, and all morbid conditions of the system, dependent upon the deficiency of THE VITAL FORCES, whether arising from Climate, Brain Fag, or whatever

DR. LALOR'S PHOSPHODYNE being a natural RESTORATIVE, its Energising Effects are not followed by corresponding re-action; but are PERMANENT; and are frequently shown from the first day of its administration by a remarkable increase of Nervous Power, with a feeling of Vigour, Strength, and Comfort, to which the patient has long been unaccustomed. DR. LALOR'S PHOSPHODYNE gives back to the Human structure in a suitable form the Pliosphoric or Lively Animating element of life which has been wasted, and exerts an important influence directly on the Brain, SPINAL MARROW, AND NERVOUS SYSTEM, of a Nutritive, Tonic, and Invigorating character; thereby checking all Wasting of the Vital Fluid, and the more Exhausting Processes of Life, maintaining that Buoyant Energy of the Brain and Musculer System which renders the MIND CHEERFUL, HAPPY, BRILLIANT, and ENERGETIC; entirely overcoming that Dall, Insotive and Sluggish disposition which many persons experience in all their actions. A Marvellous Restorative for Brain Toilers, Clergymen, Business Men, and all who are engaged in the Competitivo Strug-

PHOSPHODYNE, the Antidote for Climatic Disease. The Remedial properties of DR. LALOR'S PHOSPHODYNE have spread its fame throughout every Nation and Country the World, the natural outcome of which that the sale has now become enormous in India. China, Africa, and other Hot Climates. This increased demand is attributable to the fact of its possessing in the most perfectly assimilable form the essential Vitaliaing properties of PHOSPHORUS, which resumates the hansted functions of Life when impaired by Heat or other causes. A very large number of Testimonials from all parts of the World freely offered from Distinguished Families, Private Persons, Military, Naval, Scientific and Pr. fessional Men who are well known, speak of its marvellous powers in Nervous Debility, WANT OF STAMINA, FEVERS, MALARIOUS D.S. EASES, and as a LIVER TONIC.

PUBLIC NOTICE AND WARNING .- To Medicine Vendors and the Public in Great Britain, India, China, and the Colonies.-DR. LALOR'S PHOSPHODYNE is the only Medicine bearing the name PHOSPHODYNE that has the Sanction of the British Government and for which Her Majesty's Registrar of "Trade ONLY. Therefore DR. ### THE CHINA REVIEW.

THE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or Notes and Queries on the Far East, is issued at intervals of two months, each number containing about 60 extern pages.

taining about 60 octave pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such

extra matter. The subscription is fixed at \$6.50 postage

paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East" generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Criginal contributions in Chinese, Latin, French, German, Franish, Italian or Portuguese, are admissible. Endeavours are made to present a resumé in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

department. Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which though asking for information, furnish new or unpublished details concerning the matter in hand. It is desirable to make the Queries proper as brief and as much to the point as possible.

The China Review for July and August, 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are accertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the heview. Address China Review, Hongkong .- Northern

Christian Advocate (U.S.) Trubner's Oriental Record contains the following notice of the China Review :- "This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot as in some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago has been much regretted in Europe as well as in Chins. The present publication, judging by the number new before us, is intended to occupy a position, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked for from the members of the foreign consular services, the Uhinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, and who are severally represented in the first number of the Leview by papers highly creditable to their respective authors. In a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of benour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only bistorically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the China Review may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will form a substantial octavo magazine.

# THE CHINESE MAIL.

This paper is now issued every day. The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Seven Dollars Fifty Cents in-

cluding postage to Coast ports. It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course derived from the native community, amongst whom also are to be found the guaranters and securities necessary to place it on a business and legal footing.

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,from Australia, California, Singapore, Penang, Salgon, and other places frequented by the Chinese,—consider themselves justified in guaranteeing an ultimate circulation of between 3,000 and 4,000 copies. The advantages offered to adverthe foreign community generally will find it to their interest to avail themselves of

them. The field open to a paper of this description—conducted by native efforts, but progressive and anti-obstructive in tonein almost limitless. It on the one hand commands Chinese belief and interest while on the other it deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials with Local, Shipping, and Commercial News and Advertisements. Subscription orders for either of the above may be sent to
